

In recent decades *We the People* have observed, with increasing disgust, the accelerated “fundamental transformation” of our constitutional republic into a socialist democracy on its way to being part of a communist one world dictatorship.

We have watched the incremental dismantling of our freedoms that threatens our way of life, our national sovereignty, our standard of living, our economy, our values and the future of our children and grandchildren.

In more recent years *We the People – Alabama* have watched as those individuals, groups and organizations dedicated to the dismantling of America have become more brazen and operated more openly than ever before.

We have come to the realization that our incremental enslavement is not the fault of one world government zealots, greedy international bankers and corporations, religious fanatics or even illegal immigrants. Nor is it the fault of self-serving, corrupt or incompetent politicians, lawyers and government bureaucrats. It’s not even the fault of liberals, socialists, progressives, communists, democrats or republicans.

Instead, the blame rests solely with

We the People

for allowing it to happen.

and

it is going to get worse until a sufficient number of us come together to halt our slide into political and economic slavery and begin to undo the damage that has been done over the last 100+ years.

It is for that purpose
that *We the People – Alabama* was created.

Because the preservation of human freedom still depends on what each of us does...
or fails to do.
